

KEY SAFETY ELEMENTS

HIGH VISIBILITY CROSSWALKS

- Makes crosswalks and pedestrians more visible to drivers

SIDEWALKS AND ADA RAMP

- Improves safety and mobility of pedestrians
- Improvements designed to limit slip, trip, and fall hazards for pedestrians

LEADING PEDESTRIAN INTERVALS

- Prioritizes pedestrians by providing “walk” signal before vehicles can enter the intersection

COUNTDOWN SIGNAL HEADS

- Tells pedestrians how long they have to cross the intersection

ACCESS MANAGEMENT

- Closure of driveways improve mainline traffic flow and reduces conflict points
- Restricted access at driveways and intersections reduce conflicts

RAISED MEDIAN

- Improves safety by reducing conflicts
- Provides refuge for pedestrians crossing the roadway

FLASHING YELLOW ARROWS

- Improves safety of left turning vehicles

NEW PAVEMENT MARKINGS

- Improves driver guidance and lane visibility

RELOCATE CROSSWALKS

- Provides shorter, more direct crossings
- Improves pedestrian visibility for oncoming traffic

MID-BLOCK CROSSINGS

- Provides shorter, more direct crossings
