

PUBLIC INFORMATION MEETING

Devine Street Corridor Study

Thank you for attending our **Public Information Meeting** for the South Carolina Department of Transportation's (SCDOT) Devine Street Corridor Study in Richland County. SCDOT is evaluating **potential corridor improvements** to Devine Street in Columbia, SC from Harden Street to Millwood Avenue.

SCDOT is sharing potential design alternatives for the corridor for public review at today's meeting and online on the project website. The public is **encouraged to review** the potential design alternatives and **provide feedback**.

Your input is important to SCDOT as we identify a preferred alternative design for the Devine Street Corridor in **early 2026**.

Comments may be submitted to SCDOT Project Manager, **Joey McIntyre**, through December 19, 2025.
