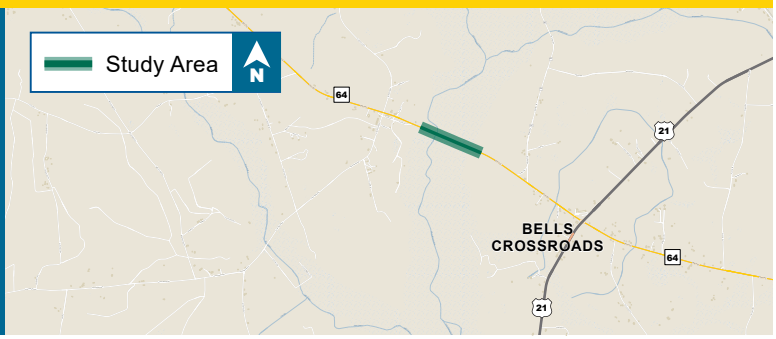
# SC 64 Bridges

## Over Little Salkehatchie River, Tributary to Buckhead Creek, and Buckhead Creek in Colleton County

SCDOT



## Project Overview

SCDOT proposes to replace the three bridges along SC 64 over the Little Salkehatchie River, Tributary to Buckhead Creek, and Buckhead Creek in Colleton County. The original bridges were constructed in 1931 and were widened in 1970. They have exceeded their standard design life and do not meet current seismic standards. The purpose of the project is to correct structural deficiencies and to provide new bridges and roadway approaches that meet current standards.

***The project will:***

- Provide new bridges and roadway approaches
- Bring the roadway and bridges up to current SCDOT standards
- Remove vehicle weight restrictions for all bridges

## Timeline

**2026** | **2027** | **2028** | **2029**

**WE ARE HERE**

**SUMMER 2026**
Schematic & Environmental Development

**SEPT. 2026**
Preliminary Design Complete & Environmental Document Submitted

**OCT. 2026**
Environmental Document Approved

PERMITTING

**APR. 2027**
Final Construction Plans

**AUG. 2027**
Project Goes Out to Bid

**FALL 2027**
Construction Begins

CONSTRUCTION

**2029**
Anticipated Construction Completion

*Subject to change*

## Preliminary Closures & Detours

SCDOT expects the proposed bridges to be constructed on or near the existing alignment, with a full roadway closure and detour route. During the SC 64 closure, traffic will be detoured around the project area via alternate state routes.

Motorists should follow SC 217 (Lodge Highway) to US 21 (Lowcountry Highway) and continue to Bells Crossroads.

The detour route will be marked by signs, and is about 17 miles for both eastbound and westbound traffic.

| Closure Type | Duration |
|---|---|
| **Roadway Closure** | 18 to 24 months |
