

BRIDGE REPLACEMENT PROJECT

US 76/US 378 (Garners Ferry Road) over US 601 (McCords Ferry Road)

Bridge Replacement Project

SCDOT plans to replace the existing bridge on US 76/378 over US 601. The bridge is structurally deficient and will be replaced with a new bridge that meets today's design and safety standards.

Construction Traffic Detour

A map of the planned construction traffic detour is shown above. During bridge construction, two lanes of traffic will flow in each direction from US 76/378 onto the newly improved bridge ramps that run alongside US 76/378.

In both directions, both lanes of through traffic will continue smoothly from the ramps back onto US 76/378. Temporary traffic signals will be installed at US 76/378 and US 601 to help drivers safely navigate the detour route.

Bridge construction is scheduled to begin in October 2025 and will last approximately 14 months.
