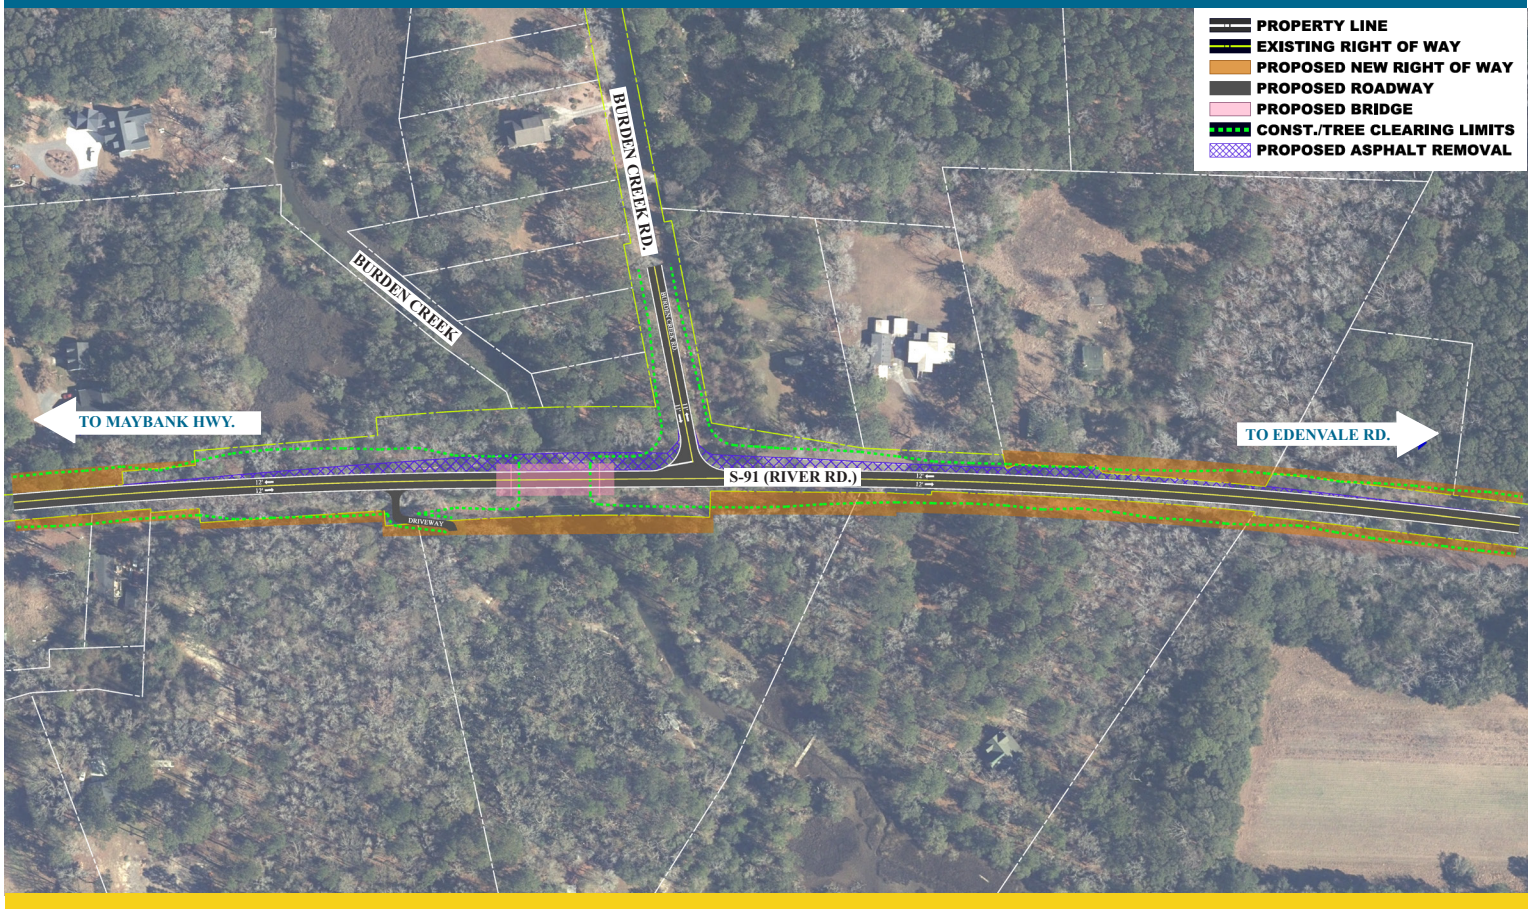
BRIDGE REPLACEMENT PROJECT

South Carolina Department of Transportation

S-91 (River Road) over Burden Creek



Project Description

SCDOT proposes to replace the S-91 (River Road) bridge over Burden Creek on Johns Island in Charleston County. The existing bridge is comprised of two, 10-foot travel lanes with approximately one-foot paved shoulders.

The project includes replacing the existing bridge structure and constructing the roadway to meet current design and safety standards. The proposed roadway section will now provide two, 12-foot travel lanes with two-foot paved and eight-foot grassed shoulders.

To minimize traffic disruption, SCDOT will keep River Road open to vehicle traffic during construction by building the new bridge in stages.

Project Schedule

- Right of Way Acquisition: Spring 2027
- Construction: Early 2028
- Construction Duration: 12 to 18 months
