

INTERSECTION IMPROVEMENT PROJECT

US 25 at Shortcut Road and Trailside Drive

Project Description

SCDOT proposes to improve the intersection of US 25 (Edgefield Hwy.) at L-720 Shortcut Road and S-494 Trailside Drive. The proposed improvements include a new signal, designated turn lanes, and realignment of Trailside Drive.

The purpose of the project is to improve operational efficiency at the intersection, where there are currently no designated turn lanes. Shortcut Road and Trailside Drive are misaligned, causing challenges for vehicles making turning movements at the intersection.
