US 76 (Clemson Blvd) Corridor Safety Improvements Project

The proposed project will:

The South Carolina Department of Transportation (SCDOT) proposes to implement changes on US 76 (Clemson Boulevard) from near the Interstate 85 Interchange (MP 8.0) to Cinema Boulevard (MP 11.0) that are intended to improve safety of the corridor as well as reduce the frequence and severity of crashes. Additionally, SCDOT proposes to implement accommodations to enhance pedestrian safety.

US 76 (Clemson Blvd) Corridor Safety Improvements Project

HOW SAFETY PROJECTS ARE IDENTIFIED

Federal Highway Safety Improvement Program (HSIP)

This intersection was selected for improvement through the HSIP. This program uses a data-driven strategic approach to identify locations throughout the state with high crash rates or patterns and implements safety enhancements through infrastructure-related improvements. The HSIP project selection requires an engineering study that includes an analysis of the crash data, an assessment of the field conditions, and an evaluation of all potential countermeasures to maximize safety benefits with the amount of funds invested.

Project Background

The project was initiated by SCDOT's Office of Traffic Safety. The project began with a Road Safety Assessment (RSA) which was performed by a multidisciplinary team consisting of representatives from SCDOT, Federal Highway Administration (FHWA), engineering firm AECOM, Anderson County, City of Anderson, SC Highway Patrol, and Anderson Clemson Area Transportation Study (ACATS). With input from these organizations, the RSA provided recommendations for improving the safety along US 76 (Clemson Boulevard) from the Interstate 85 Interchange to Cinema Boulevard.

Project Highlights

- Installation of concrete medians in areas with high frequency of angle collisions
- Installation of ADA compliant pedestrian ramps, crosswalks, and countdown pedestrian signals at signalized intersections to improve pedestrian safety
- Upgrading signal equipment and intersection operation to improve safety at signalized intersection
- Installation of new sidewalks

Project Schedule

- Public Comments: November 17 to December 16, 2026
- Right of Way: Summer 2027
- Construction: Fall 2028
